

World Biodiversity Forum 2026 - Davos

BIODIVERSITY 3

Leveraging Long-Term Ecological Data for Evidence-Based Biodiversity Policy and Action

Collaborative Research Action proposal

Agence Nationale de la Recherche (**ANR** - France)

Agence Nationale de Recherche pour l'Environnement (**FERPA** - France)

Context : large-scale ecosystem degradation & crossed planetary boundaries

We need to re-equilibrate research projects to actual causes of losses

Why a new Collaborative Research Action on Biodiversity

Two practical examples of TD transcending long-term monitoring projects

monitoring → local capacity → shared ownership → governance → management

combined:

- external scientific experts
- locally based science practitioners
- community monitoring staff
- standardised ecological monitoring
- capacity building
- MPA management and governance

Ahmadia et al. (2017) DOI: 10.1016/j.biocon.2017.04.025

<https://birdsheadseascape.com/about-the-birds-head-seascape/>

Two practical examples of TD transcending long-term monitoring projects

2½ years of monitoring by 97 rangers and 350 community volunteers
over 1 million hectares of **Philippine protected areas**.

Interventions aimed at protecting natural habitats.

Proposal: support & enhance transdisciplinary long-term biodiversity monitoring

BIODIVERSITY III ...

... Promotes capacity building

... Supports existing programs

... Is Action oriented

... develops TD

Timeline & political context

SUSTAINABLE DEVELOPMENT GOALS

Alignment of BIODIVERSITY 3 with global initiatives

- Fits at least SDGs 13-15
- Benefits from BIODIVERSITY 1 & 2 projects
- Links with other CRAs eg OCEAN 2
- Bridge with BIODIVERSA+ (depends on FP10)
- Contact w/ GBIF

Next :

- ipbes research gaps -> contact in Nairobi
- link w/ UN Decade on Eco Restoration
- link w/ UN Ocean Decade
- Alignment w/ GEOBON, eLTER, etc.
